BlackDiamond_SpecialEA Parameter Guide

Time Set For Ea Run

Fixed Lot System (U can change Ur Sell as u wish)

Take profit

Stoploss

Ea will close all open positions in profit % (Suppose Deposit 100\$ after trade ea make 130\$, then ea will close all open position instantly)

Ea will close all open position in loss % (Suppose Deposit 100\$ after trade ea make 90\$, then ea will close all open position instantly)

Trailing stop If true then Ea will work for profit block

X pips profit block = 170

Here this will work when market price move another 100 point

(X plus profit block + Marketprice move) mean 170 + 100 = 270.

When 270 point market price then, X pips profit block will move = 170 point. Then Trailing step start move for 150 point.

Max Order Number if 5 and open max order = true then when condition meet ea will open 5 position at a time in single bar.

Notification by Email = true, then u will get notification to ur email when ea open and close order. Close Button Use = True. In our software here have a close button, when u click on it ea will close all open trade.

For Every 100\$ size ea will open 0.01. If Auto lot true (U can change ur self this as ur wish)

If Martingale true, and ea loss any trade that time, then in next trade ea will open double lot size. like this it will happened like 5 time, bcz max level of martingale is 5

Thank You
Happy Trading.
Best of luck.
